XYLOBANDS

KEY FEATURES

9. WALK-AWAY MODE

Xylobands can be programmed with a 'walk-away' mode that will continue wherever the band goes after the event, remaining lit until the battery stops.

10. RECYCLE

Go Green: Xylobands can be recycled for reuse, reconditioned with new batteries that extend the active use to more events.

11. BATTERY LIFE - MULTI-DAY USE

Xylobands have three versions available with different battery life: 1 day, 3 day, and 5 day use.

12. FLAT LED TECHNOLOGY

Xylobands are thin, fabric wristbands, with flat LED's ALL the way around the band.

XYLOBANDS

KEY FEATURES

13. CHANNELS / ZONES

Thousands of unique zones and channels create exciting LED light patterns, with each zone or channel controlled separately, adding unlimited ways to engage your guests and control color designs across the event. PROXIMITY EFFECTS allow areas of light to travel or highlight areas in the event.

14. RF - RADIO CONTROL

Xylobands RF controlled Intelligent LED wristbands feature reliable transmission and reception; lighting up wristbands within range. Xylobands use a single transmitter to run an entire venue, 50,000 Xylobands, or more, from one ground based transmitter. No rigging required.

15. SHOW CONTROL

Xylobands are controlled live, or as fully pre-programmed shows, using time code, DMX. Xylobands set to sync with video, music, lights, or with each other, or DJ synchronized, unlimited options. Light Up Your Audience whenever you choose.

16. RFID TICKETING, TRACK & TRIGGER

RFID / NFC - ID chips added to your Xylobands create a wide range of intelligent wristband technologies combined!
