

# HYPERVSN

*a UNIQUE way to deliver images to the eyes!*

## Floating Video

### BREATHTAKING HOLOGRAPHIC DISPLAY

There is nothing like it, seeing Floating Video in person is eye-popping. The first impression is surprise, as the bright LED video is literally floating in mid-air.

### NEW TECHNOLOGY

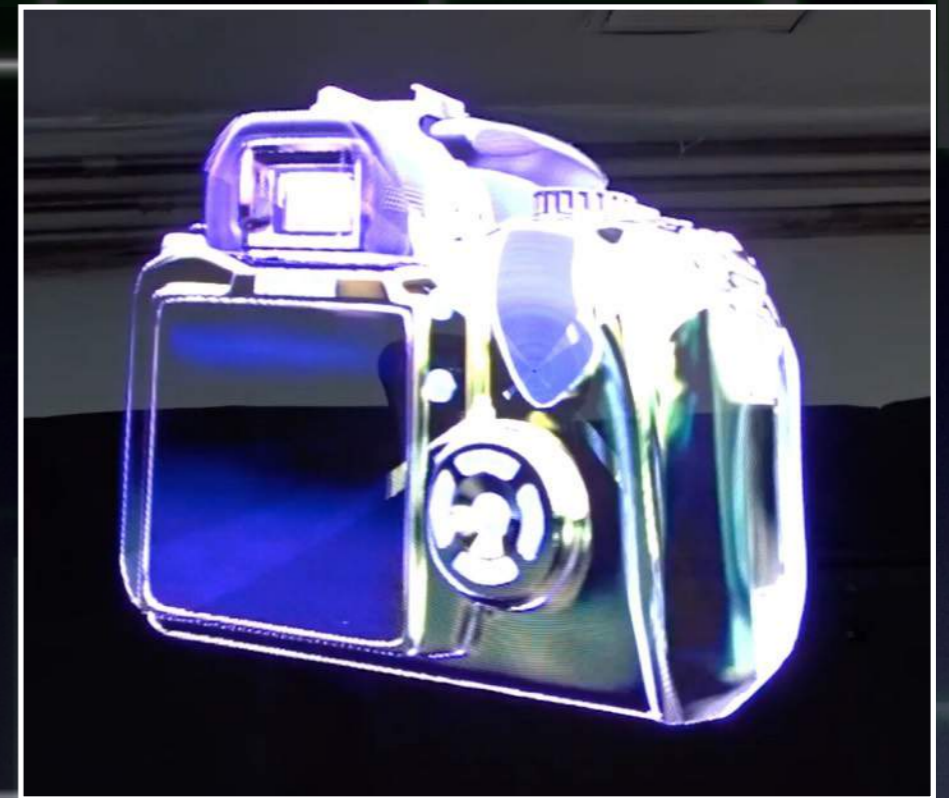

Unique LED video creates stunning 3D visuals perceived by viewers as brilliant, colorful holograms. The hi-speed fan creates see-thru imagery unlike anything seen before.

### VISUAL IMPACT

The holographic effect is so powerful it cannot be reproduced on video or photography, it is created to be experienced in person.

### FEATURES

- Video 2 foot wide display
- Up to 5 hours of video content playback
- Bright LED provides vivid colors
- Wireless content upload, control
- Lightweight device mounts easily
- Self-contained
- Combine devices for displays over 10 feet wide
- Complete event support from TLC
