

RFID HANDSHAKE

RFID technology can be used to transfer information instantly from one person to another. This technology can be put into a Xyloband or other bracelet and act as a tool to help facilitate networking and information exchanges at events

DATA EXCHANGE
> Fast, Fun, Easy

RFID and NFC technology is now available for the special events industry!
 Unlimited uses that put guests fully in the future.
 We provide the software platform, the tag ID chips, and the readers used for location tagging.
 We create highly interactive user experiences by combining the benefits of NFC,
 Proprietary Hardware and a cloud based management portal.

RFID - RadioFrequency ID - TLC RF1
